PROFILE

I am specialised within datawarehousing, staging, reporting & analysis and operations incl. optimizing the BI platform end-to-end. Furthermore, I have a deep understanding of the SAP ERP system, specialized in finance & logistic reporting and many other areas plus non-SAP. In the last four years I have been working with SAP BW on HANA using LSA++ optimizing the usage in industries like Utility, Production and Pharma. I use my analytical and technical skills as foundation when working as a Tech Lead, Architect, Advisor or Developer. My professional vision is to leverage SAP BI technology combined with agile software development to improve decision making for my clients by creating useful data warehousing and reporting solutions.

TECHNOLOGY SUMMARY

SAP areas:	BW (certified C_TBI30_74), BO (C_TBI30_74) and HANA (certified C_HANASUP_1), BPC

RECENT PROJECTS

BW/HANA Developer and Solution Architect (Leo Pharma, Copenhagen, Denmark)

04.2017 | now

Part of many different projects and RFCs (most important listed below):

- Project: Include brands for all finance transactions and create Group P&L based on BPC Consolidation. SAP Embedded BPC was introduced as part of this project.
- Project: Integrate new company acquisition (legacy SAP ECC system) into global Finance Reporting.
- Project: SAP BI Finance re-modelling to optimize and streamline finance reporting. As part of the project system was upgraded to SAP BW on HANA 7.5.
- Create BW/HANA developer guidelines to streamline and control future development to follow best-practice.

Technologies: SAP BW 7.5 | SAP HANA 1.0

BW/HANA Developer and Solution Architect (Ørsted, Copenhagen, Denmark)

04.2015 | 03.2017

Part of many different projects including:

- Project: New Finance BI solution based on newest version SAP BW on HANA (7.4). Responsible for blueprint as solution architect and implementation plus near shore coordination.
- Part of new finance solution was implementation of "simple finance" based on New GL line items, which made CO, CO-PA and PCA obsolete and benefits from SAP BW on HANA was used. This prepared the customer for future implementation of S/4HANA Finance.
- Consolidation of SAP systems on one central solution. SAP BW solution architect and developer in primary reporting areas: FI-GL, CO-PA, FI-CO, PPM, PS, PM.
- Solution advisor for the BI manager.

Technologies: SAP BW 7.4 | SAP HANA 1.0

BW Developer (VELUX, Copenhagen, Denmark)

05.2014 | 03.2015

- Build data foundation for many dashboards including E-Commerce for Sales Management, portfolio of dashboards for top management. Data foundation was SAP BPC, SAP ECC (Finance & Logistic).
- Automate manual process of combining data from different sources using SAP BW on HANA. Output was monthly scheduled WEBI reports and new Dashboard aligned with VELUX global management reporting.

Technologies: SAP BW 7.3 | WEBI | SAP HANA 1.0
