

# Thomas Nørding

SAP Principal Consultant  
BW, HANA

## PROFILE

I am an experienced full stack BI developer with a proven track record of delivering innovative solutions ranging from business process design to application modelling and systems integration. I have 19 years' experience within the SAP BI suite including domains of data modeling, technical implementation, corporate reporting, data governance, authorization, planning as well as a cross skills in ABAP. Before entering into BI, I was working 2 years as an ECC consultant. A background giving me solid insights into logistic and financial processes. I have a passion for the latest technologies and trends in the SAP BI ecosystem and have in recent years also gained solid experience within BW on HANA and HANA native. My professional vision is to leverage core SAP BI technology to drive performance management and reporting to the next level and thereby enabling clients with data and performance for informed decision making – both operational and strategic.
