PROFILE

With more than 20 years of consulting experience in the SAP area, mainly within BI and Analytics, I offer and deliver development and advisory services in an honest, direct and professional way. Always in close interaction with the business, relevant stakeholders and other team members. My focus is highly on technology and agile project delivery, though still being able to contribute to a positive working environment.

My personal, analytical and technical skills are my foundation when working as an Advisor, Project Manager, Team Lead, Solution Architect or Developer – often with several roles in parallel.

TECHNOLOGY SUMMARY

BW/HANA areas	All BW versions, BPS, IP, HANA, BO, AMDP scripts, Calculated/Scripted Views
Front-end Tools	SAC, BO (Analysis, Lumira), BEX
SAP reporting areas	High focus on Sales, Purchasing, Logistics and HR, but still with in-depth knowledge on Production, QM, APO, Controlling and Finance

RECENT PROJECTS

Sr. BW/HANA Developer and Solution Architect - JYSK, Aarhus, Denmark

03.2018 | Current

- Preparation and planning for BW/4 upgrade (on-going)
- Miscellaneous implementations, maintenance and upgrades of JYSK BI solution in all reporting areas
- Implementation of a Supplier Performance Management solution (version 1 and 2), utilizing BW/HANA mixed modelling for optimized flexibility and performance. The solution gives JYSK deep insight in several KPI's across all suppliers, with direct Lumira access for suppliers own KPI's

Technologies: BW 7.5 | HANA 2.0 | ABAP | SQL | Calc/Scripted Views | Lumira Designer

Sr. BW/HANA Developer and Solution Architect - Salling Group, Aarhus, Denmark

04.2017 | 12.2017

- Implementation of a new HANA optimized (LSA++) model for the current high-focus Stock and Material Movement solution. The project was implemented with success, fulfilling all main criteria's including improved reporting performance, deductions of data footprint in the "billion-record" retail solution and simplified operational tasks and preparation for a more flexible reporting environment.

Technologies: BW 7.5 | HANA | ADSO | AMDP | Composite Provider | ABAP | SQL | Calc/Scripted Views

Sr. BW Developer - Leo Pharma, Ballerup, Denmark

12.2016 | 03.2017

- Project member in LEO "system stabilization" project, with focus on operational stability and Data load improvement
- Credit Management reporting.

Technologies: BW 7.4 | Business Objects

Test Manager, Project Manager & Sr. BW Developer - Arla Foods, Viby J, Denmark

06.2014 | 03.2017

- Technical Advisor and Test Manager in Arla's HANA upgrade/migration project
- Project Manager in Arla's "HANA Business Enabling" project (BW on HANA) – with the main purpose of migrate and/or re-engineer all existing solutions to new HANA technology
- BW developer in Arla's "One Quality & One 13. Payment" project, with the purpose of global alignment of processes for Arla Members (owners).

Technologies: BW 7.4 | BW 7.5 | HANA | Business Objects
